## **ITTIHAD TAHAFUZ FOUNDATION**

Recent times have seen unprecedented sufferings for the marginalized segments of society. Poverty and suffering have increased due to the pandemic coupled with extraordinary inflation. The role of **ITTIHAD TAHAFUZ FOUNDATION** has therefore increased manifold. Nevertheless, we are totally committed to providing relief to people in various facets of life such as ration supplies, health education, orphan care, clean water supply, and micro-loans through our **ITTIHAD KAROBAR** program

Our specialized campaigns for highly subsidized Covid PCR tests vaccination campaigns including SMALL AND LARGE CAMP, DOOR TO DOOR VACCINATION, disinfection sprays and fumigation drives have provided relief to millions of people in Karachi. The key stakeholders in our efforts have been the donors of OUR NPO Karachi, and the heartening thing is they come from every walk of life. Their generosity has been amazing, enabling us to continue our deserving sections of society. I strongly appeal to all whether living in PAKISTAN specially from Karachi OR abroad to come forward and help us in providing much needed relief to the poor. May Allah accept the generosity of our donors and the great performance of our volunteers and field-workers.

## HEALTH SERVICES

The Messenger of Allah said, "Make use of Medicine, for Allah has not made a disease without sending a remedy for it, with the exception of one disease, namely old age," — sunan Abdu Dawood

Pakistan is ranked outside 100 of 190 countries in terms of overall healthcare performance by the WHO (World Health Organization). With a mere of 2% of its GDP allocated for total health expenditure, Pakistan struggles to maintain a proper healthcare system.

Numerous weaknesses plague Pakistan's healthcare system such as poor governance, outdated facilities, insufficient resources, inadequacy of trained staff, unaffordability, inaccessibility, and absence of a modern health management system. The doctor to population ratio stands at one doctor to every 1500 people, when it should be one for every 1,000. Consequently, fatal diseases like dengue and malaria continue to claim human lives, while maternal and infant mortality rates are one of the highest in Asia.

In these circumstances, **ITTIHAD TAHAFUZ FOUNDATION** tries its best to support the existing healthcare system by providing emergency measures as well as permanent medical facilities to alleviate the suffering of the common man.

## FREE MEDICAL CAMP

In a backward and lower income area especially in suburbs of Karachi, ITTIHAD TAHAFUZ FOUNDATION specialist and trained medical staff arrange day-long free of cost medical camps for patients of every illness. Minor eye operations are also conducted as well as medicines and glasses are provided free of cost.

## CLEAN WATER

The Messenger of Allah (SAW) was asked, "Which charity is best?" He replied, "(Providing) water." - Sunan Abu Dawood

One of the biggest challenges of our time is the availability of clean drinking water. Most areas in KARACHI Pakistan suffer from an acute shortage of water, especially in the summer when the situation is made worse by prolonged droughts. Even where water is available, there are serious doubts about its suitability for human consumption. Only 30% of the population has access to drinkable water, while the rest have to manage with contaminated water. As a result, waterborne diseases such as diarrhea and Hepatitis B, C are common, claiming the lives of tens of thousands of children every year. Arsenic poisoning, a direct result of water contamination, is also a major hazard, threatening almost 60 million people in the country. Faced with these dire statistics, ITTIHAD TAHAFUZ FOUNDATION has taken up the challenge of providing safe and clean water to the most vulnerable sections of society, both in rural and urban areas. It undertakes initiatives such as installing water filtration plants in the urban centers of Karachi, digging water wells in the rural areas around Karachi, as well as Thar and Balochistan, and providing a variety of pumps wherever needed.

## INSTALLATION OF HAND PUMP

Water is a basic necessity. In many rural areas of Sindh there is no access to clean drinking water or even water as such. Women have to walk miles and miles to get water for drinking and other purposes. ITTIHAD TAHAFUZ FOUNDATION has initiated setting up of handpumps in far off remote areas. These handpumps go down to a depth of 250 feet or even more. This is a form of Sadqa Jariya and supplies the essential need of water. The water is used for drinking purposes as well as other daily life necessities. The hand pumps have been installed in Thatta, Badin, Mirpur Khas, New Chorr, Umerkot as well as Tharparker. Overall 25 handpumps have been installed by ITTIHAD TAHAFUZ FOUNDATION.

## CREATING AWARENESS

There are many problems around the water crisis due to lack of awareness of this issue. Hence, ITTIHAD TAHAFUZ FOUNDATION strives to highlight the importance of clean water, and the consequences of using unsafe water. Among these efforts is the marking of March 1993 as world water day.
